

## REMARKS

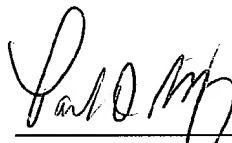

Applicant notes with appreciation the Notice of Allowance issued for claims 1-7. However, Applicant wishes to include new claims 8 and 9 into this application prior to issuance and accordingly has filed this Amendment together with the appropriate Request for Continued Examination. The scope of claims 8 and 9 are similar to claims 1-7, and accordingly applicant respectfully submits that for the same reasons that claims 1-7 have been held allowable, so should claims 8 and 9 be held allowable.

Support for new claims 8 and 9 can be found throughout the Specification, as originally filed. The first receiver for receiving the sequence of recordings is disclosed on page 4, lines 27 - 31, which states, inter alia, the camera data is downloaded to the PC 5 by USB connection, removable storage device, etc. The second receiver for receiving the sequence of auxiliary items is disclosed on page 17, lines 3 - 5, which states, inter alia, that location data is transferred to the PC 5 by a wire link, infrared link or short-range radio link or a network connection. The matching is carried out by correlation block 142 (Fig. 14, page 20, lines 1-4) of the album program 50 (Figs. 3 and 12) that runs on PC 5 or other computing equipment (page 16, lines 20 - 22). Accordingly, no new matter has been added by the inclusion of these claims.

Consideration and allowance of application is respectfully requested.

Respectfully submitted,
